GOOD NEWS

JACK DOHANEY HAS DEVELOPED A VERSION OF MSCRIPT WHICH NOT ONLY DRIVES AN 80-COLUMN PRINTER BUT WHICH INCLUDES THE FOLLOWING PATCHES:

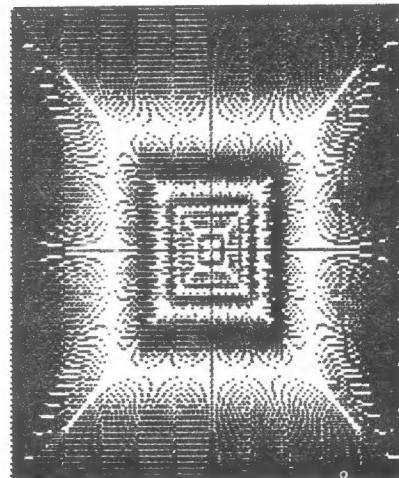

1. OPTION FOR FAT LETTERS,
2. OPTIONS FOR PAPER COLOR,
3. RETURN TO CURRENT MSCRIPT,
4. COLD START FOR MSCRIPT,
5. PROGRAM UTILITY ROUTINE,
6. A "STOP" (TO BASIC), AND
7. ALLOW FOR BACKUP COPIES.

IN ADDITION, HE HAS REASSIGNED THE KEYS FOR A MUCH BETTER CONTROL OF THE CURSOR AND FOR EASIER USE OF THE DELETION FUNCTION.

FOR FURTHER INFORMATION, CONTACT:

JACK DOHANEY

VU-CALC for the AERCO CENTRONICS
PRINTER I/F and 80 COLUMN PRINTERS
by Pat Morrissey

(c) 1985 C.P. Morrissey. All rights reserved. Do not copy or reprint in whole or part without express written permission of the author. Commercial use strictly prohibited.

As promised, here are the program lines to make the Psion Software Program VU-CALC work with your AERCO Centronics Interface and "80 Column" Printer to give you full page width presentation for your data.

Required hardware and software are:

1. T/S 2068 Computer
2. AERCO Centronics Printer I/F
3. 80 Column Printer
4. Tape Recorder
5. VU-CALC
6. AERCO printer driver software -
Version 2.1 - (See Note a) below.)

Below are the Basic program lines which are to be MERGED with the Basic portion of VU-CALC. Before proceeding, I suggest you read the article for the Tasman. Also, it might be a good idea to have your documentation for the AERCO driver available for reference, if needed. Use the same procedure as listed for the Tasman version (as summarized here) with the exceptions as noted:

1. Reset computer. Key in the lines listed herein.
2. SAVE and VERIFY them on any blank cassette.
3. Reset computer. MERGE the Basic part of VU-CALC to prevent the program from AUTO-STARTing.
4. LIST the VU-CALC Basic. MERGE in the previously SAVED lines from 1 & 2 above.
5. LIST the result. Then SAVE "vcalcP" LINE 10 on a new tape and VERIFY. This will be your actual working tape.
6. Reset computer. Place the commercial VU-CALC tape in the recorder and use the immediate command LOAD "" CODE 40000,6912:LOAD "" CODE 29328,5225. Play the other two parts of VU-CALC into the computer. Rewind the commercial tape and put it away.
7. Now replace the tape with "vcalcP" and get to the end of the Basic you just recorded. Leaving a few seconds after the Basic, SAVE "s" CODE 40000,6912. VERIFY. Now following this on the tape, SAVE "vc" CODE 29328,5225 and VERIFY.
8. Now put your tape containing the AERCO Printer driver (V 2.1) into the recorder. LOAD "" CODE 64456,1111. Rewind this tape and put it away.
9. Put your "vcalcP" tape back in and a few seconds past the end of "vc", SAVE "a" CODE 64456,1111 and VERIFY.

That's it! Now, reset the computer and use LOAD"" to test the program for proper operation.

NOTES:

- a) According to AERCO, Version 2.1 of their Printer Driver Program is the current version and the one in the widest distribution. However, there are older versions (V2.0 ?) which load to Address 64256 (200 lower than V2.1). If you have one of these older versions, try reducing all POKE addresses in the lines below by 200, with the exception of LINE 41, where the POKEs should be: 26703,5: 26704,251 : 64260,10.
- b) Like the Tasman version of VU-CALC, the AERCO version was written for use with the Star SG-10, but will also drive most other printers (including "136 Column" printers like the SG-15 and Epson FX-100) with minor changes.
- c) The AERCO version requires a few more Basic commands than the Tasman version. This is why you see more extensive use of the memory-saving "VAL" function. Again, I have not put in the usual REMark lines to properly document the revisions internally. I present here the notes which have been omitted from the program to conserve memory:

- 40 Sets z=0 and shuts off screen copy via "LPRINT CHR\$ 1".
- 41 Sets up call to "Printer Driver on LPRINT" and "Line Feed with Carriage Return".
- 42 Sets width (34) for title.
- 43 Sets "Expanding Mode" for printing.
- 51 Initialize left margin to 0.
- 53 Commands "One line expanded print", prints a\$ (title).
- 54 Sets print width (136) for table.
- 60 Commands "Condensed print."
- 63 Commands "Set left margin = s".
- 69 Checks for more columns than will fit sheet. If you choose a print font other than "condensed" (17 cpi) you will likely want to change this the number 18 to a smaller value. It is also where you would put in a larger value for a "136 Column" printer.
- 73-80 and 173-180 print the column numbers at the top and bottom of the hard copy.
- 120-160 The data "fetch"/LPRINT routine.
- 180 Commands "Pica print" (Stops Condensed).
- 2000 Disables the "#p" command (same as Tasman.)

The AERCO MERGE Program Lines for "vcalcP"

Timex hits at Sinclair

by Jane Bird and Peter Kingston

TROUBLED Sinclair Research has suffered a further blow with the discovery that Timex, the subcontractor which assembles most of its computers, is selling them abroad - and undercutting it on price.

Timex believes that its contract allows it to do this if Sinclair falls behind with payments. The Dundee-based assembler and Sinclair's other prime contractor, Thorn EMI, are together believed to be owed around £10m, though both have agreed to extend credit by two months.

Timex has approached Zeta Marketing of Manchester and asked it to dispose of an initial 5,000 Spectrums overseas. Zeta is offering these at a trade price of £71, around £16 less than Sinclair. The machine retails for £129.95.

Loading Tasword II on the A & J Microdrive

Using the A & J Microdrive to load Tasword II takes less than 30 seconds! But to SAVE the program and files created by it requires some modifications to the BASIC part of Tasword II.

To make the changes, LOAD Tasword off tape and choose the BASIC option. DELETE lines 11, 15, 700 and 710. Now add the following lines:

```
15 POKE VAL "23609", VAL "2": CLEAR
VAL "33279": GO SUB VAL "4000":
LOAD "@tasword"CODE: CLS: LET a=USR
VAL "59061": GO TO VAL "10"
```

```
700 CLS: LET a$="@tasword": SAVE
"@1,tasword"LINE 15
```

```
710 SAVE "@2,tasword"CODE 54784,
10751
```

```
1060 IF a$(1)<>"@" THEN GO TO 1100
```

```
1070 LET a$(2 TO )=a$(4 TO )
```

These changes allow you to use either cassette or microdrive for saving files. Just remember to begin files for the microdrives with @ and the number of the file followed by a comma and the file name up to 7 characters long. Files without the @ will save to the cassette. (Example: @1,sample)

To SAVE Tasword to microdrive after the above changes GO TO 1 and then select the "Save Tasword" option. Save it on a 20' cartridge with no other files on it.

To LOAD Tasword, type LOAD "@tasword" RETURN.

-- Joe Williamson

Potential investors in Sinclair are expected to demand the introduction of some strong new senior management. The company is already looking for a chief executive so that Sir Clive could step down from the post and remain as chairman. But troubleshooting chief executives for troubled micro companies are proving hard to find - Acorn has been looking for several months without success. One obvious candidate, Robb Wilmot, has already joined forces with Sinclair for an ambitious chip project. The possibility that he might accept a full-time post has been denied by Wilmot, who is chairman of ICL, Britain's largest main-frame computer maker.

HOT BASIC no. 1

Have you ever wished the INKEY\$ function could be used to check for a combination of two keys depressed at once?

Take heart, there is a nice way around this problem. The SYSTEM VARIABLE called LAST_K, located at 16421-16422, returns a unique numeric value between 0 and 65535 for any key pressed, and also for just about any multi-key combination! Therefore, in a program, you can use

PEEK 16421+256: PEEK 16422 instead of INKEY\$. A practical example might be using this to get a "diagonal" result by pressing two cursor keys at once.

This short listing will let you find values for different combinations of keys, and see how the principle works.

```
10 PRINT AT 5,0;"PRESS A KEY COMBINATION."
20 PRINT AT 9,5;"CURRENT LAST-K VALUE"
30 LET K= PEEK 16421+256: PEEK 16422
40 PRINT AT 10,10;" "; AT 10,10; K
50 GOTO 30
```

ZX81/T51000
TIPS FROM
THE MAY/JUNE
1985 SINCE-
LINK N/L OF
TORONTO.

Note: In LINE 40, 5 spaces between the quotes. You can record the values you get for use in your own programs. Note that the "current" value is shown ONLY while you have the key(s) depressed.

HOT BASIC no. 2

Here is another example of How It Pays To Know Your System Variables.

The infamous 0 REM machine code line can cause problems if it has had the two "NEWLINE" codes POKEd in to make the machine code disappear from the listing. You may find that while you can LIST a different line number, if you ENTER a new line, or do some EDITing, that 0 REM keeps popping up again and again. Very distracting, isn't it?

We can fix the problem by POKEing the SYSTEM VARIABLE called S_TOP, at 16419. It holds the value of the top line number in automatic listings. To do it, first determine the line number of the first "normal" BASIC line after the machine code. For our example, let's say this is line 5. Follow these steps:

```
LIST 9999 & ENTER
POKE 16419,5 & ENTER
LIST 5 & ENTER
```

Voila! So long as you don't get careless and enter "LIST" without a line number, the display listing will behave normally.

This technique can be useful in regular BASIC programming, too. Can you see how?

Aerco Interface with the Spectrum Rom

If you have converted your 2068 to a Spectrum and have the Aerco parallel printer interface, here are the changes needed to run the print driver software supplied with the interface while in Spectrum mode.

First place your computer in Spectrum mode and load in the Aerco print driver software. When loaded, break into BASIC (don't initialize it like the program tells you to do - you'll just crash). Once in

BASIC, LIST line 9992 and EDIT. On line two and three where it says POKE 26704 and POKE 26703, change the 26704 to 23750 and change 26703 to 26749. Press ENTER. In the immediate mode (no line numbers) enter:

```
POKE 64441,201
POKE 64521,84
POKE 64522,31
```

Now run the program with GOTO 1 and choose the initialize routine. You are now set up to drive your printer while in Spectrum mode! Be sure you save this new version.

--Joe Williamson

LATEST VENDOR NEWS
FROM THE JUNE SUM N/L OF
GAINSEVILLE, FLORIDA.

The ENGLISH MICRO CONNECTION has announced the availability of a keyboard overlay made expressly for the TS-2068 of heavy white plastic. It can be marked on and wiped off. Bob Dyl says it will be excellent for M-Script, Omnicalc, or any other software with lots of commands. Cost is \$3.00 each postpaid from ENC, 15 Kilburn Court, Newport, RI 02840.

TS CONNECTION's Jack Roberts has informed SUM that TS Connection did not buy out Timex in Little Rock nor did they take over Timex's service business. Word from Little Rock is that they are still doing repair work. Mr. Roberts says that TS Connection does do out-of-warranty repair service on the Timex computers. Prices are supposed to be reasonable and turn-around time quick. TS Connection, 3832 Watterson, Cincinnati, OH 45227; 513-271-5575.

A new BBS service called TIMEyX'CHANGE is now on line with up to the minute news for the Timex/Sinclair computerist. Any TS computer with a modem will be able to log on to this service. Exchanging of messages is also supported. Contact Ed Grey at P.O. Box 2186, Inglewood, CA 90305; call 213/325-0213.

FROM THE RAMTOP N/L
IN CLEVELAND, OHIO.

The Computer Widows Corner

Here is a new column just for the "computer widows" out there! This article is from my wife Shirley.

Just a few lines from a computer widow! You've heard of the "foot ball widow" and the "base ball widow", so I thought it was time that we were given some recognition. When the computer comes out there I sit listening to the click click of the keys and the buzzing of the printer. The articles that only were going to take a short time usually turn into hours, so I have my choice, listening to these sounds or finding something else to do. Usually I phone a friend or now that the weather is nice I take a long walk. I thought that many of you wives could relate to this, The Widows of The Greater Cleveland Sinclair Users Group. Let's ban together you widows and start a column of our own! Send your articles, recipes, jokes, or whatever to: SHIRLEY R. DUPUY

6514 Bradley Ave.(DOWN)
Parma, Ohio 44129
Phone: (216) 661-4105

MTERM AND SPECTRUM
FROM THE MAY RAMTOP N/L
IN CLEVELAND, OHIO.

At last! Now you can use your Spectrum ROM and MTERM without crashing on exiting the MTERM program. It's easy!

Because RAMTOP has to be lowered for MTERM to work with the Spectrum, make this little loader program.

Write this one line program.

10 CLEAR 53950: LOAD "" CODE:
RANDOMIZE USR 54016

SAVE it using SAVE "MTERM"
LINE 10.

LOAD the orginal version of
MTERM code. Once loaded, add the
following POKEs.

POKE 54554,207: POKE 54555,255

SAVE this version on MTERM by
entering: SAVE "MTERM" CODE
54016,7721. Save it on the
tape you saved the one line
program on.

Now LOAD your customized ver-
sion of MTERM into your
Spectrum. The program will
autorun, so the loader program
can be removed by erasing the
buffer.

Now you can exit from MTERM
without crashing. When you
exit MTERM, the menu will still
be on the screen, but a press
on the enter key will get your
listing.

One word of caution. The
buffer controls will say that
you have 30211 bytes in your
buffer, but only about 30100 is
usable. If you put more infor-
mation than that in the buffer,
MTERM will crash.

Thanks to Thomas Simon and
Rick Conard for putting me on
the right track for this
routine.

David Hoshor

Receipts for Pineapple Dream Cake

Ingredients:

- 1- angel food cake
- 1- small pkg. of instant vanilla pudding
- 1- 20 oz can of crushed pineapple WITH
the juice!
- 1- med. size bowl of Cool Whip

First bake the angel food cake according
to the package instructions. remove it
from the mold, and spit it in half. Now
mix the above ingredients in a large
bowl and frost the cake just as you
would a regular cake. This is quick and
BOY IS IT GOOD! My husband likes it
better than a regular cake!

850721 PUG Meeting- Attnd. 11

* The video tape of the Tech-Draw program from Zebra Systems was shown.

850725 BSZUG Meeting- Attnd. 10

* The video tape of the Tech-Draw program was shown. Thanks to Don Mozer for providing the VCR and Color TV/ Monitor.

* Wayne Seibel reports Pacific Bell's Bell America service is great for you heavy Modem users. If you do most of your calling between 11:00 PM and 6:00 AM, it might pay to check into it.

* Bill Miller demonstrated his BASIC interface from ZX Spectrum to Interface 1. It connects to the ZX Spectrum via a serial port on the back of the computer. The Interface 1 connects to the printer via a parallel port. Thanks to them up on page 91 of the January 1984 issue of "Your Computer" by Kathleen Peeli.

850730 SVSTUG Meeting- Attnd. 20

* The Tech- Draw video tape was shown.

* Terry Greenlee demonstrated his Program to POKE characters from a string array into a REM statement. Terry created a 10240 character (320 line) REM statement and then used his program to POKE the contents of an 8000 BYTE Character Array into it. The program deletes the unused part of the REM statement when it is done.

This allows us to create long BASIC program lines (such as this article) with a text editor. Jack Dohany's TYPEWRITER 32 was used for this article. TYPEWRITER 32 is available from the TIMELINEZ library for \$4.00 on cassette.

Contact:

Jack Dohany
325 O'Connor Street
Menlo Park, CA 94025

or

Bill Miller 408 253-3175
6675 Clifford Drive
Cupertino, CA 95014-4530

We hope to incorporate these concepts into an information management system which will allow us to create, store, and transmit information records of variable length as long BASIC program lines.

These lines will probably be DATA statements on the TS2068 and ZX Spectrum, but could be converted to PRINT statements for the ZX81/ TS1000.

This system should be especially useful with a 64K RAM.

Searching this information should be very easy with any of the TOOLKIT programs which search a BASIC program for a specified string.

Jack Dohany reports he is converting several of the ZX Spectrum TOOLKIT programs to work on the TS2068.

* Welcome to new SVSTUG members Helen St. Cyr and John Kindsvater.

850731 SVSTUG Workshop meeting Attendance 5

* Since someone who shall remain nameless to save him embarrassment forgot to pick up the key, the meeting was held in the Great Western Savings parking lot. However, the weather was good.

* Fred Griswold, a student at UC Santa Barbara, reports he is in need of a low cost assembler like FASM for the TS1000. Fred is working on a music editing program for the TS1000. Can anyone help?

* Speaking of music, the June/July issue of ZX Computing has a very good article reviewing MIDI (Musical Instrument Digital Interface) Interfaces for the ZX Spectrum and music synthesizers that can be used with them.

* For those of you having difficulty getting Sinclair specific magazines, you might try

Matt Maddox 415 327-6500
Printers Inc., Bookstore
310 California Avenue
Palo Alto, CA 94306

Matt reports Printers Inc. normally stocks

Sinclair User
User
Electronics & Computing
Sinclair Programs

If you can't go to the store because you live in some exotic place like La Plata, Argentina, San Jose, Costa Rica, or Berkeley, CA, Matt says shipping and handling (in the US) on all four magazines could be as low as \$1.50. He plans to increase his order for these magazines. Check with him for firm US prices and the feasibility of foreign orders.

(714) 531-0499

Dear [redacted],

I would like some information on becoming a member of your club group. I am a ZX Spectrum and a Texas 1068, and my main interest is Assembly Language Programming.

I have at present about 600(-ish) programs for the Spectrum Computer, and some of the programs include:

Adventure, Breakout, Pong, Asteroids, Space Invaders, and a multitude of games of various genres, some more than others.

If there are any "heat-the-key" programs that you may like and interested in to be included in the disk, I also have contacts in the UK, and as far as the author, can get details of publication.

Jack Dohany reports he is a frequent friend of the Computer Age.

I am looking forward to hearing from you
(my add is 306-600-0010) *[Signature]*

D LIPINSKI SOFTWARE

ONE OF PERSONAL COMPUTER PROGRAMMING

ZX-SPECTRUM SIMULATOR - BASIC PROGRAMMING LANGUAGE

MONITOR (132x192x16)

Dear ZX-Spectrum User Group:

I would like to know more about the group you have, as would many other ZX-Spectrum users. In the next update to the magazine, I will include a special section for user groups. I am listing the known user groups along with this listing I wish to place important information on the group.

Information that might be included might be:

- 1) Name of members?
- 2) How long has the club been in existence?
- 3) How often do you meet?
- 4) What kind of dues and/or newsletter?
- 5) Do you publish a newsletter and how often?
- 6) Who should be contacted to join?
- 7) Brief description of the goals of the group?
- 8) What kind of activities does the group have of interest?
- 9) Does your group have any special needs?

Information that would not be published in the guide but would be gathered and distributed to user groups and suppliers:

- 1) What type of equipment does your group have and number of units type each?
- 2) What do you plan to see developed?
- 3) What is your opinion of the suppliers now serving the ZX-Spectrum computer?
- 4) List your choices for the 4 best and 4 worst suppliers.
- 5) What is the best software source?
- 6) What is the best publication? List your reason.
- 7) What bulletin boards do you use or know of? List what is of interest to other V-9 users?
- 8) What other computer associations do members of your group belong to?

Please you for your time and help in getting this information to other ZX-Spectrum users. We all need to share the information we have with others to keep the ZX-Spectrum computer alive. Please send me the DUE SUMMER GUIDE TO DLIPINSKI SOFTWARE SERVICES, INC., 132x192x16, Box 132, Encino, CA 91316. Price is \$1.00 postpaid; it includes the next update at no additional charge. Over 1400 items covering all topics and much more to come. I will be looking forward to hearing from you.

Very truly yours,
Art Lipinski

July 22, 1983

Greetings,

We would appreciate hearing the information about our swap meet or your newsletter, news letter or perhaps mentioned at your next meeting. Of course this information may be included in the next issue of Computer Swap America or the user date in order to meet your editorial policy.

Registration is free. Come down to our swap meet in the community room at the Encino Community Center in the Encino area. Encino is located in the San Fernando Valley area. Many are always attended by knowledgeable computer enthusiasts and professionals in the computer and electronic industry. Components and parts are available from sellers in an informal atmosphere. Come down and have fun. We are open to all computer systems. For more information call (619) 566-9162 or write Computer Swap America, PO Box 638107, Encino, CA 91343.

Our swap is one of the first in the country and the largest in the San Fernando Valley area. They are always attended by knowledgeable computer enthusiasts and professionals in the computer and electronic industry. We believe Computer Swap America offers some excellent personal computing hardware available to the general public and do this interaction can be of service to you personally.

Very truly yours,
CARLY MURPHY
President
Computer Swap America, Inc.

Dear ZX-Spectrum User Group:

I found the name of your group in Computer Swap and decided to let you know that we are still in business and still support the Sinclair community.

For those of you preparing new software for the ZX-Spectrum, this will be your first choice.

Order II - This program uses basic methods of menu to create drawings, letters, etc. and anything else you might want to draw. For the month of June and July this program costs only \$10.00. This program is available in the August issue of Computer Swap. Order II - This program uses basic methods of menu to create drawings, letters, etc. and anything else you might want to draw. For the month of June and July this program costs only \$10.00. This program is available in the August issue of Computer Swap.

Peach II - This program uses basic methods of menu to create drawings, letters, etc. and anything else you might want to draw. For the month of June and July this program costs only \$10.00. This program is available in the August issue of Computer Swap.

Peach II Productions will supply Peach II or Computer II to you with your printer, disk storage device, or interface connecting them.

Peach II Productions has many dealers around the country including:

The Computer
E. Arthur Green
Software Publishing
Programs Plus Software

If you have any questions, comments or want to order go to your local computer store or telephone or by mail to Peach II Productions, 13201 Encino, CA 91316. Tel: (619) 566-9162

T/S 2068 BOOKS

UNTIL RECENTLY, THERE HAVE BEEN ONLY EIGHT BOOKS DEVOTED EXCLUSIVELY TO THE TIMEX SINCLAIR 2068 COMPUTER:

- * THE 2068 PERSONAL COMPUTER USER MANUAL, CHARLES DURANG
- * TIMEX SINCLAIR COLOR GRAPHICS, NICK HAMPSHIRE
- * TIMEX SINCLAIR 2068 BEGINNER/INTERMEDIATE GUIDE, FRED BLECHMAN
- * THE TIMEX SINCLAIR 2068, ROGER VALENTINE
- * THE WORKING TIMEX SINCLAIR 2068, DAVID LAWRENCE
- * THE TIMEX SINCLAIR 2068 EXPLORED, TIM HARTNELL
- * TIMEX SINCLAIR 2068 TECHNICAL REFERENCE MANUAL, CORCORAN AND BRANIGIN
- * TIMEX SINCLAIR 2068 INTERMEDIATE/ADVANCED GUIDE, JEFF MAZUR

THERE IS NOW A NINTH BOOK ON THE MARKET:

T/S 2068 BASIC AND BEYOND,
BY SHARON ZARDETTO AKER

THIS NEW BOOK IS DESIGNED FOR BEGINNING AND INTERMEDIATE PROGRAMMERS. IT COVERS THE BASICS OF PROGRAMMING, NUMBERS, FUNCTIONS, STRINGS, GRAPHICS, PEEKS AND POKEs, SOUNDS, LOGIC, TIPS, AND TECHNIQUES.

IT IS A VERY THOUGHTFUL BOOK WHICH INCLUDES OVER 120 SHORT PROGRAMS TO ILLUSTRATE ALL OF THE ABOVE SUBJECTS. FOLLOWING ARE SOME EXAMPLES (WITH MINOR REVISIONS) OF THESE MANY PROGRAMS.

IN THE FIRST EXAMPLE, A SELECTED CHARACTER APPEARS IN THE UPPER LEFTHAND CORNER. THEN THE POINT FUNCTION IN LINE 70 DETERMINES WHETHER THE PIXELS IN THAT SPACE ARE ON OR OFF AND PRINTS THE RESULTS IN AN 8 BY 8 MATRIX.

```
10 REM **POINT DEMONSTRATION**
20 INPUT "PRESS ANY KEY AND ENTER ";A$
30 PRINT AT 0,0;A$
40 PRINT AT 4,0
50 FOR Y=175 TO 168 STEP -1
60 FOR X=0 TO 7
70 PRINT POINT (X,Y);
80 NEXT X: PRINT : NEXT Y
90 GO TO 10
```

BY CHANGING THE LAST NUMBER IN LINE 60 TO 31, FOUR CHARACTERS CAN BE ENTERED AT A TIME.

THE NEXT EXAMPLE IS A VERY SIMPLE, STRAIGHTFORWARD ILLUSTRATION OF THE DEF FN STATEMENT. IT SHOWS HOW FUNCTIONS CAN BE DEFINED AND THEN USED IN A PROGRAM AS NEEDED.

```
10 REM **DEF FN DEMONSTRATION*
20 DEF FN T(A,B,C,D)=A+B+C+D:
REM TOTALING ROUTINE
30 DEF FN V(A,B,C,D)=(A+B+C+D)/4:
REM AVERAGING ROUTINE
40 DEF FN D(N)=INT (N*100+.5)/100:
REM ROUNDING ROUTINE
50 PRINT "INPUT FOUR DOLLAR/CENT AMOUNTS"
60 INPUT A'B'C'D
70 PRINT TAB 16;A';TAB 16;B';TAB 16;C';TAB 16;D;TAB 16;"----"
80 PRINT "TOTAL",FN T(A,B,C,D)
90 PRINT "AVERAGE",FN V(A,B,C,D)
100 PRINT "ROUNDED AVERAGE",FN D(FN V(A,B,C,D))
```

(CONT. NEXT PAGE)

THE FOLLOWING EXAMPLE TRANSLATES NORMAL CHARACTERS (WITH 8 BY 8 PIXELS) INTO CHARACTERS WHICH ARE 64 TIMES GREATER IN AREA.

```

10 REM CHARS MAP DEMONSTRATION
20 INPUT A$: PRINT A$
30 LET MAP=(PEEK 23606+256*PEE
K 23607)+CODE A$*8
40 FOR A=0 TO 7
50 LET P=PEEK (MAP+A)
60 IF P=0 THEN PRINT : NEXT A
70 FOR B=7 TO 0 STEP -1
80 PRINT INVERSE INT (P/2^B);"
";
90 IF INT (P/2^B) THEN LET P=P
-2^B
100 NEXT B: PRINT : NEXT A
110 GO TO 10

```

THIS FINAL EXAMPLE IS A PROGRAM THAT SYNCHRONIZES THE PRINTING OF LYRICS ON THE SCREEN WITH THE NOTES OF THE TUNE BEING PLAYED.

```

5 REM ** WORDS AND MUSIC **
10 PRINT "ROW, ROW, ROW YOUR B
OAT": GO SUB 50
15 PRINT "GENTLY DOWN THE STRE
AM": GO SUB 50
20 FOR N=1 TO 4
25 PRINT TAB N*2;"MERRILY": GO
SUB 50
30 NEXT N
35 PRINT "LIFE IS BUT A DREAM"
: GO SUB 50
40 PAUSE 50: CLS : RESTORE : G
O TO 10
50 READ A: IF A=99 THEN PRINT
: RETURN
55 READ B: BEEP A,B: GO TO 50
60 DATA .75,0,.75,0,.5,0,.25,2
,.75,4,99
65 DATA .5,4,.25,2,.5,4,.25,5,
1.5,7,99
70 DATA .25,12,.25,12,.25,12,9
9
75 DATA .25,7,.25,7,.25,7,99
80 DATA .25,4,.25,4,.25,4,99
85 DATA .25,0,.25,0,.25,0,99
90 DATA .5,7,.25,5,.5,4,.25,2,
1,0,99

```

"T/S 2068 BASICS AND BEYOND" IS A VERY GOOD BOOK. FOR THOSE WHO HAVE GONE THROUGH THE BEGINNING PHASE OF LEARNING SINCLAIR BASIC AND WHO WISH TO MOVE BEYOND (TO AN INTERMEDIATE LEVEL), THIS BOOK IS AS GOOD OR BETTER THAN MANY ON THE MARKET.

IT CAN BE PURCHASE FROM

SCOTT, FORESMAN AND COMPANY
1900 EAST LAKE AVENUE
GLENVIEW, ILLINOIS 60025

FOR A COST OF \$9.95.

FOR ONLY AN ANNUAL SUBSCRIPTION TO NEWSLETTER, SEND \$10 CHECK
PAYABLE TO: TIMELINEZ, P.O. BOX 1312, PACIFICA, CA. 94044.

PUG WORKSHOP

The September 15th meeting of the Peninsula User Group will host a workshop based on an article by Rex Lundgren in the June issue of TIMELINEZ. Rex has developed a simple method of improving the LOAD level capabilities of the 2068 computer.

Any Bay Area group member who wants to have his computer modified as described in the article is invited to attend the meeting. Pug will provide the required parts, tools and installers. Although the modifications are minor, we cannot take responsibility for the outcome. For directions to the PUG meeting call George at 359-3198.
